

High Capacity Shredder

MODEL 20390 High Capacity Shredder

Product Features

Precision Milled Cutting Cylinders

- Milled from a solid bar of steel for durability
- Ensures a perfectly matched set of cylinders

Automatic Jam Protection

- Reduces paper jams and eliminates frustration
- Prevents shredder down time

Chain Driven Motor

- Steel chain and gears for slip-free power
- Maximizes sheet capacity and performance

German Engineered

- Quality build with trouble free operation

User-Friendly Convenience Features

- Automatic On/Off for quick & easy power up
- Bin Full Auto-Off for bag change notification

Shreds staples, paper clips, CDs & DVDs

The Dahle 20390 High Capacity Shredder supports the high-volume shredding needs of busy offices and departments. It features a powerful chain driven motor, precision milled cutting cylinders, and automatic jam protection to eliminate frustration. This P-2 shredder produces a ¼" particle size and holds up to 50 gallons of shredded waste. It's German engineered and guaranteed to provide many years of trouble free operation.

Precision Milled Cylinders

This shredder features solid cutting cylinders milled from a bar of German Solingen steel. They're perfectly aligned in an all-steel frame and guaranteed for life. The result is a machine with strength, power and the ability to handle all of your data destruction needs.

Jam Protection

Fewer things are more frustrating than a paper jam. With automatic jam protection, this shredder prevents those annoyances. If sheet capacity is exceeded, the motor automatically stops and reverses to push the paper back out. This prevents a jam and makes it easy to re-feed fewer sheets.

Chain Driven Motor

Fewer things are more frustrating than a paper jam. With automatic jam protection, this shredder prevents those annoyances. If sheet capacity is exceeded, the motor automatically stops and reverses to push the paper back out. This prevents a jam and makes it easy to re-feed fewer sheets.

The precision milled cutting cylinders are chain driven for maximum power and capacity.

The electronic control panel allows for auto on/off, continuous run, and reverse operation.
